

Subject: Application for Data Science Analyst – Request for Consideration

Dear Recruiter,

I hope this message finds you well.

I am writing to express my strong interest in the 'Data Science Analyst' position at Definitive Health Care, as advertised on LinkedIn. After reviewing the job description and requirements, I believe that my educational background and relevant experience align well with the qualifications you are seeking.

I hold a Bachelor of Engineering in Mechanical Engineering from BMS College of Engineering, which has provided me with a solid foundation in relevant skills and knowledge. Additionally, I have completed certified Data Analysis courses by IBM on Coursera, which I believe would enable me to contribute effectively to your team.

Due to personal circumstances, including the loss of both my parents in the past five years, I have faced significant challenges. I am currently in the process of completing two remaining engineering subjects, having been unable to finish eight subjects due to these circumstances. As the sole breadwinner of my family, with the responsibility of supporting my younger sister, securing this position would greatly assist me in providing for my family and advancing my career. I share this information not as a plea but to offer context for my situation, hoping for a fair opportunity to demonstrate my capabilities in the interview or test process.

I understand that each candidate brings a unique set of experiences and skills to the table. I am confident that my specific strengths and experiences make me a suitable candidate for this role.

Given my background and the alignment between my skills and the job requirements, I would be grateful if you could consider my application for this position. I am very enthusiastic about the prospect of contributing to Definitive Health and am eager to discuss how my qualifications align with your needs in more detail. This is an extra effort on my part to request you to consider me for the job.

Thank you for considering my application. I am looking forward to hearing from you.

Warm regards,

Shashank Paramashivam
